TMDCX

# Can *you* make textmode look good?

**TMDC** is a pseudo-annual demo-making contest
held over the internet.

**TMDC10** is yet again organized by **tAAt ry**, registered non-commercial
organization in Finland, which aims to promote demo-making culture.

**TMDC10** will be held from **11.11.07 to 12.12.07.**

**The submission deadline** is thus **12.12.07.**

You can **submit your entries** starting from **11.11.07.**

Text mode demos offer unique challenges for the demo maker which play a very insignificant role in
other kinds of demo competitions.
First of all, resolution and color spaces are rather limited, forcing the demo authors to consider
different forms of anti-aliasing and careful adjustment of contrast and color balance.
